

• Hypothesis testing

- ① Null Hyp. (H_0)
- ② Alternate Hyp (H_1)

We solve these using ~~Conf~~ Confusion matrix

	H_0	H_1 (Truth)
do not Reject	OK	Type 2 error
Reject	Type 1 Error	OK

• Steps to solve

→ ① Make Initial Assumptions

② Collect data

③ Gather Evidence to Reject or
Not REJECT - Null Hypothesis

④ Hypothesis Test

⑤ P-Value

⑥ T test

⑦ ANOVA TEST (large d. set)

⑧ Z Test.
